Name: **SL-4 Rocket**
 Decayed: 13 Feb 2013
 Brightness: 5.0 mag (at 1000 km, 50% illuminated)
 0.4 mag (at perigee, full illumination)
 USSPACECOM Nr: **39083** Internat. Designator: **2013-007B**
 Orbit: 172.7 x 199.4 km, 88.2min Inclination: 51.6°
 Age Elements: 1 days

Cloud map from 13/02/2013 21:00 UTC

The green circle shows the position of the selected spacecraft, and its area of visibility at the time requested. The ground track (red/orange) is plotted for the time interval covering 2.3 orbital period(s); most of the satellites move from left to the right, i.e., eastwards. The track is red for times prior to listed time, and orange after this time. A thin satellite ground track and footprint outline indicates the satellite is in the shadow of Earth and not visible by optical means. The yellow dot is the position with the Sun directly overhead, and the green cross is your position.
